

Facilities

- Proton Production Numbers
 - Have provisional numbers on Fermilab, CERN, J-PARC
 - Seeking more guidance on CERN scenarios from Roland Garoby
 - Plethora of options have been mooted over the years
 - Trying to stay on the mass shell in terms of possibilities
- Neutrino Beam Info
 - Have decided to take data in the form it was available
 - Looking for energy-spectrum by flavor of operating and proposed beams in various configurations
 - Decided it was too much trouble to develop all the beams into GLoBES format
 - Not available from many experiments, and no consistent standard for producing the fluxes
